SURYO AJI WASKITHO

Software Engineer

Surabaya, East Java • suryojiwa@gmail.com • +62817212108

PROFESSIONAL EXPERIENCE

Amartha Mikro Fintek **Surabaya, East Java**

Mobile Engineer **2021-2026**

- Built a server-driven UI system for lending features in the app's home screen, so the product team can launch and update promotional banners without waiting for a new app release.
- Improved data-sync issue that created duplicate loan applications when field agents had a weak internet connection, removing a recurring manual cleanup task for the operations team.
- Improved app stability by resolving four recurring crashes and an app freeze during file downloads.
- Initiate bank account validation to the loan application flow by connecting it to the company's payment system, helping prevent fraud, while keeping it usable offline for field agents in rural areas.
- Contributed beyond mobile, building web frontend features in Next.js and backend services in Golang.

Twiscode **Surabaya, East Java**

Mobile Engineer **2020-2022**

- Developed cross-platform Flutter apps for clients in fintech, healthcare, the creator economy and professional networking.
- Built a native Android B2B analytics app for Indosat Ooredoo.
- Turned client requirements and designs into working app features, integrated with backend APIs, across several projects in parallel as a mobile engineer.
- Key projects: XENI Keyboard, a keyboard app giving access to Xendit payment services; Saham Rakyat, a stock investing app; KAMI, a subscription-based content creator platform; Farhana Medika, a medical services app for Farhana Medical.

Ide Solusi Asia **Surabaya, East Java**

Mobile Developer **2016-2020**

- Developed native Android apps (Java, Kotlin) end to end for clients in hospitality, education, events and government, from stakeholder's requirements.
- Integrated apps with backend REST APIs, tested endpoints, and ran quality assurance before each release.
- Set up mobile CI/CD with Bitrise to automate app builds and releases.
- Planned and tracked project tasks and timelines using project management tools like Trello and ClickUp, and wrote technical documentation for delivered apps.
- Key projects: hotel operations app for Shangri-La Hotel; LiveLync, a digital business card app for professionals; Aspire-life a learning app for LearnFlux, OBVIO event attendance app for VISEO, and presence reporting app for Dinas Pendidikan Sampang.

EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya (EEPIS/PENS) **Surabaya, East Java**

Bachelor of Applied Science (BASc) Computer Engineering **2012-2016**

Sepuluh Nopember Institute of Technology **Surabaya, East Java**

Informatics Engineering Venture Program **2011-2012**

PUBLICATION

- Merging of Depth Image Between Stereo Camera and Structure Sensor on Robot "FloW" Vision (June 2017)
  International Journal on Advanced Science Engineering and Information Technology
- FloW vision: Depth image enhancement by combining stereo RGB-depth sensor (November 2016)
  The Fifth International Conference on Knowledge Creation and Intelligent Computing (KCIC)

ADDITIONAL INFORMATION

- **Mobile**: Kotlin, Java, Dart, Clean Architecture, Coroutines, WebView/JavaScript bridge, server-driven UI
- **Tools and testing**: Firebase: Firestore, Remote Config, Crashlytics, Storage, Analytics; CleverTap for analytics; Specification-Driven Development using Spec Kit
- **Mentoring**: Mobile Developer Mentor (part-time), Flashcom Indonesia, 2018 to present
- **Awards**: Best Paper, 5th International Conference KCIC (2016); Semi-Finalist, Microsoft Imagine Cup Indonesia (2016); Best Application, Software EXPO (2015); 2nd winner at GS Astra Power of Innovation Award (2014)
- **Languages**: Indonesian (native), English
